CONTENTS

Number 1

N. Matsue & K. Wada. Source minerals and formation of partially interlayered vermiculites in dystrochrepts derived from tertiary sediments 1

W. R. Roy, J. J. Hassett & R. A. Griffin. Quasi-thermodynamic basis of competitive-adsorption coefficients for anionic mixtures in soils 9

N. J. Barrow & B. B. Whelan. Testing a mechanistic model VII. The effect of pH and of electrolyte on the reaction of selenite and selenate with a soil 17

N. J. Barrow & B. B. Whelan. Testing a mechanistic model VIII. The effects of time and temperature of incubation on the sorption and subsequent desorption of selenite and selenate by a soil 29

P. Papadopoulos & D. L. Rowell. The reactions of copper and zinc with calcium carbonate surfaces 39

R. J. Xie & A. F. Mackenzie. Effects of sorbed orthophosphate on zinc status in three soils of eastern Canada 49

P. H. Le Mare & L. A. Leon. The effects of lime and adsorption and desorption of phosphate in five Colombian soils 59

G. J. D. Kirk & S. Staunton. On predicting the fate of radioactive caesium in soil beneath grassland 71

S. G. Patil, V. A. K. Sarma & G. W. Vanloon. Acid rain, cation dissolution, and sulphate retention in three tropical soils 85

K. Raulund-Rasmussen. Aluminium contamination and other changes of acid soil solution isolated by means of porcelain suction-cups 95

D. J. Linehan, A. H. Sinclair & M. C. Mitchell. Seasonal changes in Cu, Mn, Zn & Co concentrations in soil solution in the root-zone of barley (*Hordeum vulgare* L.) 103

M. V. Cheshire & B. S. Griffiths. The influence of earthworms and cranefly larvae on the decomposition of uniformly ^{14}C labelled plant material in soil 117

L. M. Benzing-Purdie & J. H. Nikiforuk. Carbohydrate composition of hay and maize soils and their possible importance in soil structure 125

A. Hadas, A. Feigin, S. Feigenbaum & R. Portnoy. Nitrogen mineralization in the field at various soil depths 131

J. R. M. Arah & K. A. Smith. Steady-state denitrification in aggregated soils: a mathematical model 139

E. Mignard & J. C. Benet. Diffusion of methyl bromide in soil 151

J. M. Kirby. Measurements of the yield surfaces and critical state of some unsaturated agricultural soils 167

T. R. Nisbet, C. E. Mullins & D. A. MacLeod. The variation of soil water regime, oxygen status and rooting pattern with soil type under Sitka spruce 183

D. McGarry. The effect of wet cultivation on the structure and fabric of a vertisol 199

Number 2

A. WILD. Soil scientists as members of the scientific community 209

M. B. DALE, A. B. MCBRATNEY & J. S. RUSSELL. On the role of expert systems and numerical taxonomy in soil classification 223

D. J. CHITTLEBOROUGH. Genesis of a Xeralf on feldspathic sandstone, South Australia 235

G. D. TOWNER. The application of classical physics transport theory to water movement in soil: development and deficiencies 251

T. BRANDYK, R. ROMANOWICZ & K. SKAPSKI. Determination of the exponential unsaturated hydraulic conductivity function by parameter identification 261

L. A. MACKIE-DAWSON, C. E. MULLINS, E. A. FITZPATRICK & M. N. COURT. Seasonal changes in the structure of clay soils in relation to soil management and crop type. I. Effects of crop rotation at Cruden Bay, NE Scotland 269

L. A. MACKIE-DAWSON, C. E. MULLINS, M. J. GOSS, M. N. COURT & E. A. FITZPATRICK. Seasonal changes in the structure of clay soils in relation to soil management and crop type. II. Effects of cultivation and cropping at Compton Beauchamp 283

A. FORTUN, C. FORTUN & C. ORTEGA. Effects of farmyard manure and its humic fractions on the aggregate stability of a sandy-loam soil 293

J. L. HONEYSETT & D. A. RATKOWSKY. The use of ignition loss to estimate bulk density of forest soils 299

D. R. BOULDIN. A multiple ion uptake model 309

D. J. CAMPBELL, D. G. KINNIBURGH & P. H. T. BECKETT. The soil solution chemistry of some Oxfordshire soils: temporal and spatial variability 321

R. J. HAYNES, R. S. SWIFT. Effect of rewetting air-dried soils on pH and accumulation of mineral nitrogen 341

A. M. T. MAGALHÃES & P. M. CHALK. Interaction of methyl nitrite with the inorganic and organic fractions of soils 349

R. L. PARFITT. Phosphate reactions with natural allophane, ferrihydrite and geothite 359

R. L. PARFITT, L. J. HUME & G. P. SPARLING. Loss of availability of phosphate in New Zealand soils 371

L. M. CONDRON & K. M. GOH. Effects of long-term phosphatic fertilizer applications on amounts and forms of phosphorus in soils under irrigated pasture in New Zealand 383

J. J. SCHOENAU & J. R. BETTANY. ^{34}S natural abundance variations in prairie and boreal forest soils 397

N. J. BARROW. Testing a mechanistic model. IX. Competition between anions for sorption by soil 415

N. J. BARROW. Testing a mechanistic model. X. The effects of pH and electrolyte concentration on borate sorption by a soil 427

N. J. BARROW, J. GERTH & G. W. BRÜMMER. Reaction kinetics of the adsorption and desorption of nickel, zinc and cadmium by goethite. II Modelling the extent and rate of reaction 437

J-M. BOLLAG & J. CZABAN. Effect of microorganisms on extractability of Cd from soil with NaOH and DTPA 451

N. SENESI & G. SPOSITO. Characterization and stability of transition metal complexes of chestnut (*Castanea sativa* L.) leaf litter 461
